

HydroTherapy

Effective and simple

Informative and efficient

HARTMANN has developed a clear colour coding system for all packaging material to provide an understandable benefit to the user:

Orientation for product selection

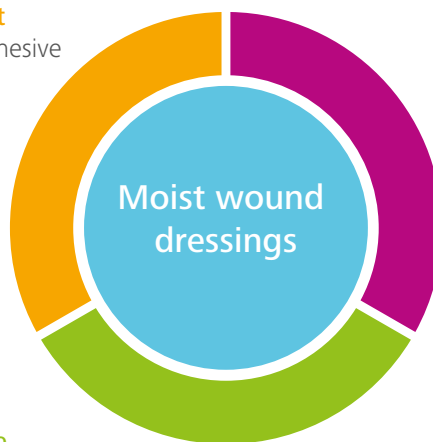

Our products feature diverse characteristics for optimum wound treatment. The colour coding system helps to clearly be able to quickly and unambiguously identify these products in everyday handling. Each colour stands for a specific complement to the core products HydroClean plus und HydroTac.

Comfort

With adhesive border

Cavity

For deep wounds

Concave

Heel & elbow

Sacral

Sacral region

- Overview of all shapes and variants at a glance
- Colour guide provides guidance on the appropriate selection of suitable preparations
- Simple selection due to application icons

Product feature highlighted in colour

Coloured hexagon for the management of the properties of the wound dressing

The coloured corner is visible from all sides and simplifies the selection of the wound dressing

Simplicity in every-day use

The idea of a simple therapy concept has been consistently integrated in the packaging designs.

The colour-based guiding system permits simple and efficient use of HydroTherapy. This design helps to select and apply the correct product in the blink of an eye.

HydroTherapy
Efficacy. And Simplicity.
